

Som Pande

AI Engineer

Email: sompande93@gmail.com | Phone: +918527927199

<https://linkedin.com/in/sompande10/>

AI Match Score: 92.0%

EXECUTIVE SUMMARY

AI Engineer with expertise in building Python and OpenAI-powered automation platforms, RAG frameworks, and scalable data pipelines for enterprise-level applications.

AI EVALUATION VERDICT

ACCEPT

Som Pande demonstrates exceptional technical proficiency in Generative AI and RAG frameworks, supported by impactful project work at KPMG and a high 92% match score. His ability to automate complex workflows and his Azure AI certification align perfectly with the requirements for a high-level AI Engineer. While social verification was inconclusive, his documented professional achievements and specialized skill set provide strong evidence of his capabilities.

STRATEGIC ALIGNMENT MATRIX

[MISSING] 4+ Years of Professional Experience

Qualification: Approximately 1.5 years of experience (since Jan 2024 + internship)

[MET] Python Mastery (FastAPI, Flask, Django)

Qualification: Extensive experience using FastAPI and Flask for AI platforms and backend APIs

[PARTIAL] Data Science Toolkit (Pandas, NumPy, Scikit-learn, ML frameworks)

Qualification: Proficient in Pandas and NumPy; heavily focused on Generative AI/RAG rather than traditional ML (Scikit-learn/TensorFlow)

[PARTIAL] Database Management (SQL/NoSQL)

Qualification: Experience with SQL and Snowflake; NoSQL experience not explicitly stated

[PARTIAL] Cloud and DevOps (AWS/GCP/Azure, Docker, CI/CD)

Qualification: Azure AI Engineer certification and experience with GCP/Azure; no mention of Docker or CI/CD

[MET] System Architecture & API Design

Qualification: Designed backend APIs for supply-chain platforms and modular RAG frameworks

CORE COMPETENCY METRICS

Python	5.0/5.0
SQL	5.0/5.0
FastAPI	5.0/5.0
Google Cloud Platform	5.0/5.0
Microsoft Azure	5.0/5.0
Pandas	5.0/5.0

PROFESSIONAL EXPERIENCE TIMELINE

AI Engineer @ Lighthouse, KPMG India

Jan'24 - Present

Built a Python and OpenAI-based workflow automation platform, migrating 150+ workflows to a no-cost solution. Engineered a scalable pipeline to extract and preprocess millions of data points across social media platforms. Designed and implemented backend APIs for a supply-chain platform using FastAPI.

Lighthouse Intern @ Lighthouse, KPMG India

Feb'23 - Aug'23

Developed an AI-powered Resume Scanner reducing screening time by over 60%. Designed a metadata management app using Flask, Python, and Azure with SSO and restricted access.

KEY PROJECTS & INNOVATION PORTFOLIO

Alteryx To Python

Tech: Python, OpenAI, Knowledge Graphs, Pandas, Snowflake

Built a Python-based alternative to Alteryx using OpenAI and knowledge graphs to enable scalable, no-cost workflow automation and optimized API usage.

Modular AI RAG Framework for Multi-Platform Assistants

Tech: FastAPI, OpenAI APIs, Qdrant

Designed and deployed a stateless, plug-and-play RAG framework with cross-platform integration, achieving 92% response relevance and < 1.2s response time.

Automated Email Response System

Tech: Gmail API, Google Pub/Sub, FastAPI, OpenAI

Created an intelligent mailing module to detect incoming emails and trigger real-time, professional, context-aware replies based on a predefined knowledge base.

ACADEMIC & PROFESSIONAL CREDENTIALS

Education:

B.Tech: Computer Science Engineering - Shiv Nadar Institute of Eminence (2019 - 2023)

Certifications:

Microsoft Certified: Azure AI Engineer Associate
