Education

Shiv Nadar Institute of Eminence

2020 – 2024

Major: Computer Science Engineering; Minor: Economics

GPA: 7.98

Scholars Rosary Senior Secondary School

2017 – 2019

XII: 88% (2019) | X: 10CGPA (2017)

Experience

ZS Associates India Pvt. Ltd.

Business Technology Solutions Associate

August'24 - Present

- Utilized Python, AWS Redshift, S3, Excel, and proprietary ZS tools to analyze and transform sales data, delivering tailored incentive calculations for a major pharma client, driving business growth through optimized solutions.
- Gained expertise in proprietary ZS tools to deliver effective client solutions, enhancing business outcomes.

Business Technology Solutions Associate Intern

Jan'24 – August'24

- Utilized cutting-edge technologies including Python, AWS Redshift, S3 buckets, Excel, and proprietary ZS tools to perform incentive calculations, leveraging extensive sales data analysis from diverse territories.
- Implemented data transformation methods to streamline and organize sales data, ensuring consistency and accessibility for accurate analyses, ultimately delivering impactful solutions tailored to a major pharma clients' needs and contributing to business growth.

Dell Technologies

Software Development Intern

May'23 – July'23

- Collaborated on the enterprise-level INaaS platform, streamlining integration processes.
- Contributed to UI projects using Angular, enhancing user experience and system efficiency. Also, designed a user-friendly Notification Management Component for administrators, allowing seamless notification management for individual users, with a sleek display system in user profiles for critical updates.

Projects

PreciseDigest - A research paper summarizer

August'23 – December'23

- Developed "PreciseDigest," an AI-driven system utilizing LLMs like DistilBART and Pegasus to enhance accessibility and comprehension of research papers.
- Integrated an interactive PDF summarizer and query system, driven by LLMs, enabling users to extract key information and engage with papers using natural language questions.
- Explored OpenHermes-2.5 Mistral-7B and GPT-3.5 Turbo models for document summarization and dynamic, context-aware responses, advancing natural language processing in the application's context.

Face Recognition Attendance System

Jan'23 – May'23

- Implemented a Face Recognition Attendance system utilizing facial recognition technology to accurately record students' attendance in class.
- Incorporated a robust proxy detection algorithm to prevent fraudulent attendance through phone screens or photographs.
- Used technologies like FR (Face Recognition) and CNN (Convolutional Neural Network) to enhance system performance and accuracy.

Park IT

Sept'22 – Nov'22

- Developed a computer vision and AI-based Parking System that efficiently scans and extracts vehicle number plates using technologies like YOLO and OCR.
- Implemented an algorithm to optimize parking by minimizing travel distance.
- Integrated a receipt generation and mobile notification feature for seamless exit gate transactions and timely parking space availability.

Skills

Languages: C++, Python, HTML, CSS, SQL

Softwares: Tableau, Figma

Technical Skills: Data Analysis, Frontend Development, Selenium, Web Scrapping, Angular Framework, Incentive Compensation

Skills: Canva, MS Word, Powerpoint, Excel, Design, Management

Achievements

Dean's List - Spring'21: -Awarded to top 5 % achievers in the university
